SUMMARY

Final-year B.Tech(AI & Data Science) student with a deep focus on core **Computer Science fundamentals**, secure **MERN stack development**, and automated **DevOps pipelines**. Proven track record architecting multi-role administrative applications with active **GitHub Actions CI/CD workflows** and optimized database architectures. Ready to leverage modern software engineering practices to deploy secure, scalable public-sector software systems.

SKILLS

Programming Languages: Java, Python, SQL	Core Computing Fundamentals: Object-Oriented Programming (OOPs), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN)	Backend, APIs & Databases: Node.js, Express.js, REST APIs, Postman, MongoDB, MySQL	Frontend Development: React.js, Next.js, HTML, CSS, Tailwind CSS
DevOps & infrastructure: Git, GitHub, Docker, CI/CD Pipelines, Linux/Shell Scripting			

PROJECTS

- RightToKnow – Intelligent RTI Management System**, *React.js, Node.js, Express.js, MongoDB*
- Built a secure enterprise app to digitize RTI lifecycles with full multi-language support across **2 primary languages (English & Tamil)**.
 - Structured a hierarchical database mapping **38+ districts** with automated **30-day statutory due-date tracking** alert mechanisms.
 - Integrated active **GitHub Actions CI/CD pipelines** to automate **12+ linting and build checks**, cutting manual verification time by **50%**.
 - Implemented strict **4-level RBAC** (CITIZEN, DEPT_ADMIN, HOD, MAIN_ADMIN) utilizing JWTs, reducing unauthorized API access to **0%**.
- LMS Admin Portal**, *React.js, Node.js, Express.js, MongoDB*
- Engineered a multi-tenant administrative engine using clean MVC architecture to manage **3 core institutional datasets** (students, faculty, courses).
 - Developed analytical dashboards using server-side **MongoDB Aggregation Pipelines**, improving query execution speeds by **35%** over standard arrays.
 - Integrated a database **Audit Log schema** to track user actions across **5+ operational modules** with high-resolution timestamps.
 - Enforced compliance by implementing **Soft Delete models** (isArchived), ensuring **100% immutable data retention** for transaction histories.

EXPERIENCE

ML intern , <i>F5Coders</i>	12/2025 – 01/2026 Tiruchirappalli
AI/ML intern , <i>Trios Technologies</i>	06/2025 – 07/2025 Chennai

EDUCATION

B.Tech in Artificial Intelligence & Data Science (Allied branch of Computer Science & Engineering). <i>Nandha Engineering College, Erode</i> CGPA: 7.1/10	2023 – 2027
HSC , <i>Sri Ram Matric Hr. Sec. School</i> 83%	2022 – 2023

CERTIFICATES

Competitive Programming: Active technical profile on LeetCode and HackerRank with 150+ algorithmic data structure problems solved.	Core Technical Credentials: Certified Graduate Attendee – Python Programming Foundations Workshop, IIT Madras (Scored in top 10% of cohort).	Data & Analytics Tools: Advanced Data Schema Architecture and Visualization Certification utilizing Tableau data modules.	Academic Performance: Maintained a clean academic record with 0 active backlogs across 7 semesters of technical engineering study.
